RE: Comments on the draft programmatic EIS/EIR

Farmers and related agribusiness in the San Joaquin Delta and San Joaquin County have a number of specific concerns about the Cal-Fed Bay-Delta proposals.

As stewards of the land, farmers are well aware of the need to continually work to solve environmental problems in our region. At the same time, Cal-Fed must be able to assure that the water needs of farmers, industries and urban residents will be met, now and in the future. A reliable water source, with improved water quality is key to the future of the San Joaquin Delta. The cost of increased water storage facilities must be shared by all: urban and rural areas, as well as agriculture and residential entities. And most importantly, both Southern and Northern California must share the responsibility for an ample water supply. The agricultural community is aware that some land must be taken out of production to make way for new water storage facilities. But for the Delta to bear the burden for the entire state is unacceptable to Northern California agriculture, and San Joaquin County.

Cal Fed must strengthen water rights and must not base its solutions on redirection of agricultural water and conversion of farmland. Please consider all this information, and find an alternative to flooding the Delta islands. An alternative must also be found for the peripheral canal-type of water transfer system, in order to maintain water quality of San Joaquin County and the delta system.

Sincerely,

Michael and Marilyn Carney  
6365 Rio Oro Drive  
Rancho Murietta, CA 95683

Though we personally are not affected by this project, we once again are upset with a government program which seems unconcerned about sacrificing a minority (in this case Delta farmers and San Joaquin County business and agriculture) to ~~solve~~ solve problems caused primarily by So. California's population explosion. With today's technology it seems ocean water in So. California could at least in part be reclaimed and used. Furthermore, what about the loss of local control of Delta water rights and quality?

We believe Cal Fed needs to go back to the drawing board to create a fair program—not one just sacrificing the Delta + agriculture so much
